

11. Method according to Claim 9, characterised in that the flexible container (3, 30, 34) is folded double along closure lines (13, 14), the container sections folded double being attached to one another by means offering resistance (23, 24, 40, 41) which are released by the fill pressure.

12. Method according to Claim 9, characterised in that during filling the flow rate and/or the fill pressure are measured and in that a change in rate and/or fill pressure is determined on release of the restraining member.

REMARKS

Entry and consideration of this Amendment is respectfully requested.

Respectfully submitted,
